Powered Access System Upgrade

For Cat® D10T and D11R Track Type Tractors

Improved Powered Cab Access System

Caterpillar is pleased to announce the introduction of a field installed, powered access ladder retrofit system for the D10T and D11R track type tractors. The complete access retrofit system requires two kits be ordered from Cat® Parts. The Cat retrofit system focuses on two main customer concerns. First, the Cat retrofit system improves access and egress to and from the operator compartment. Second, the Cat retrofit system is a fully integrated design, serviced and supported through the Cat distribution network.

Cat Integrated and Validated Design

The ladder is actuated by powertrain hydraulic oil, which means the tractor must be running to move the ladder either up or down. The actuation switch for the ladder is located on the grab rail outside the left side cab access door. All standard boarding steps and handles that are used to mount the tractor via the path up the tracks remain in place for safe boarding in the event that the engine is not running or the boarding ladder is damaged or fails. These standard steps and handles also provide secondary egress or access. With the engine idling, the ladder will extend or retract in less than 20 seconds.

Model	* Ladder Ready Kit Part Number	** Powered Access Ladder
D11R (7PZ, AAF, 8ZR, 9XR, 9TR)	354-8746	246-2042
D10T (RJG00001 - RJG02586)	365-6560	374-4542

Ordering Information

The ladder ready kit is available through the Cat parts system. The ladder ready kit includes necessary hardware to enable upgrading an older D10T or D11R tractor to accept the Cat powered access ladder option available based on the D10T or D11R production design.

The powered access ladder kit is available through the Cat parts system. This kit includes the Ladder, Hinge Assembly and Hydraulic Motor required to complete the tractor upgrade/retrofit.

Product Specifics

- Improved platform & Cab Access
- Cat integrated and validated design
- Field installed attachment

Product Support

- Detailed step-by-step Special Instruction(SI) with graphics available electronically via SIS Web to reduce installation down time

  D11R - REHS4359 Retrofitting the D11R for the Access ladder

  D10T - REHS5305 Installing the ladder arrangement and the Access Arrangement on the D10T

- Components individually serviced and backed by standard Caterpillar parts warranty

CAT® DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.
