

Cat[®] Certified Rebuild Options

For Hydraulics, Machine Components and Engines

Cat[®] Certified Rebuild value is now available in smaller packages.

- **Cat Certified Hydraulic Rebuild (CHR)**
 - For Hydraulic Excavators
- **Cat Certified Machine Component Rebuild (CMCR)**
 - For engines and/or transmission/torque converter combinations on any Cat machine which would qualify for a Cat Certified Powertrain Rebuild.
- **Cat Certified Engine Rebuild (CER)**
 - For marine propulsion, generator sets, pumps, locomotives and other Cat Power applications

CATERPILLAR[®]

Cat® Certified Rebuild Options for Hydraulics, Components and Engines

Cat Certified Hydraulic Rebuild

- When hydraulic/hystat systems need rebuilt – but the rest of the machine is running strong*
- Out-of-spec hydraulics hurt production and fuel consumption
- Full system approach restores complete hydraulic & hydrostatic drive systems to like-new performance, reliability and durability – all at one time
- Avoids expense and downtime of “chasing” problems through the system one repair at a time
- Restores all “wet” hydraulic/hystat components: pumps, motors, valves, accumulators, hoses, tubes, tanks, coolers and cylinders
- Assembled and tested to Cat cleanliness and performance specs.
- Critical engineering updates are included
- Equipment Protection Plans can extend coverage beyond the Cat parts warranty

Cat Certified Machine Component Rebuild

- When only one or two components need rebuilt*
- Restores engine or transmission + torque converter combination to like new performance
- Assembled and tested to Cat cleanliness and performance specs.
- Critical engineering updates are included
- Equipment Protection Plans can extend coverage beyond the Cat parts warranty

Cat Certified Engine Rebuild

- For industrial, and marine engines
- Restores engine to like new performance, reliability, and durability
- Assembled and tested to Cat cleanliness and performance specs.
- Critical engineering updates are included
- Engine Overhaul Protection plans can extend coverage beyond Cat parts warranty

* Based on Cat dealer inspection (TA1 or TA2)

Additional quality requirements for Cat Certified Engine & Machine Component rebuilds

Cat dealer must provide proper storage, handling, & installation:

- Must follow Cat cleanliness procedures
- All other components and systems sharing the same fluid must meet Cat cleanliness and performance spec's
 - Includes tubes, hoses, radiator, coolers, pumps, valves, etc.
- Transmission & torque converter must be rebuilt together
- After-installation fluid samples must meet Cat cleanliness spec's before return to service
 - “Kidney loop” (filter) and retest as necessary
- S•O•S™ required for duration of Equipment Protection Plan

CAT® DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.
